

INDUSTRY 4.0
CARE-NEXUS
Product by Bio-Nexus Group

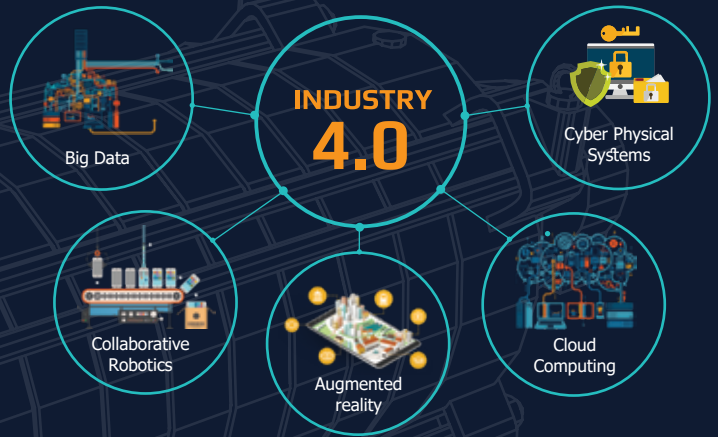

INDUSTRIAL MAINTENANCE AND ASSET MANAGEMENT PLATFORM

- + Leading cross-platform solution delivering cost reduction and time savings
- + A solution digitizing industrial processes and maintenance workflows
- + Step-by-step interactive procedures and digital records
- + Automated workflow triggering, based on actual location
- + Fast conversion of site plans into interactive maps for asset management, security and surveillance
- + Enhanced operational situational awareness with full control and management from the point-of-event to the Command & Control Center
- + Real-time synchronization between teams and tasks

SOLUTION OVERVIEW

- E2E Maintenance Management System
- Real-time synchronized performance of planned and reactive maintenance
- Field data collection enhancing situational awareness
- Remote monitoring of asset status
- Process optimization driven by data analytics
- Cross-platform standards for integration

MANAGEMENT PANEL

- Cloud-based architecture with quick access to critical data
- Advanced workflow management functionality
- Interactive 2D/3D assets visualization
- Technicians and teams status overview
- Coordination of all field work activities
- Intuitive and experience-wise designed GUI
- Advanced reporting features
- Smart alerts and notifications engine

TECHNICAL STAFF

- Accurate data collection and execution of on-site tasks
- Immediate access to up-to-date technical documentation and remote support
- Hands free solution, optional voice activation
- Navigation in the field using custom maps based on site plans
- Visibility of team resources, assignments and tasks at a glance

SYSTEM BENEFITS

- Streamline processes resulting in maintenance cost reduction by 8-15 %
- Extended service life and minimum equipment downtime
- Interactive maps for asset management, maintenance and security purposes
- Digitized maintenance procedures and machinery documentation at the point of service
